

## PIANTO'S PEST CONTROL 2020

# GREENHOUSE EMISSIONS POLICY

### POLICY STATEMENT

The Company recognises that deteriorating air quality and climate change are critical issues facing the global community and accepts the consensus that greenhouse gases in the atmosphere need to be stabilised so as to avoid adverse health impacts and assist in reducing climate change. In recognition of this need, we will implement strategies to reduce the quantity of greenhouse gases generated due to our operations, and seek the cooperation of our clients, customers and suppliers in the support of this policy.

### AIMS AND OBJECTIVES

We will investigate our use of energy from all sources to identify areas where reductions in greenhouse emissions to as low as reasonably practicable can be achieved. We will consider the adoption of new technologies where these can be used without disadvantage to the company or customers, and in using energy derived from renewable sources where practicable.

### RESPONSIBILITIES

The company will identify sources of greenhouse emissions in all aspects of its operations, including office and warehouse applications, and field operations. Management will ensure that purchasing and procurement controls include greenhouse gas consideration in manufacture, packaging and delivery aspects, and that products used have little or no greenhouse gas emissions (including VOCs) when installed.

The company will implement an emissions reduction strategy that seeks to reduce greenhouse gas emissions in the following areas:

- Use of motor vehicles and motorised plant and equipment
- Use of chemicals and cleaning products
- Use of electricity, and
- Use of office and workplace consumables.

Workers are required to support this policy in ensuring that they carry out work in a manner that reduces the greenhouse gas footprint of the company so far as is practicable in the efficient conduct of their work. Workers are encouraged to provide input into methods to further reduce the quantity of greenhouse gas emissions that result from company operations, and to identify improvements in work methods, equipment and materials that will assist in achieving the aims and objectives of this policy.
